

## Electrical maintenance appreciation/Foundation skills

### Content:

During this course you will learn the basic electrical skills in order to perform basic maintenance tasks. With an obvious focus on health and safety, you will learn how to correctly isolate and work with electrical circuits. You will also learn how to interpret electrical drawings whilst using various electrical testing equipments to test and prove electrical circuits and systems.

### Aimed at:

Anyone who wants to learn basic theoretical and practical skills of an electrical nature. The course is an ideal starting point for Mechanical biased engineers who want to up skill themselves with an electrical appreciation.

### Entry requirements:

None.

### Benefits/progression:

Completing this course will either give you, or improve your knowledge and practical skill with respect to electrical maintenance. You will also become competent in the use of various electrical test equipments. You could use this course as a spring board to becoming employed in a multiskilled (dual) engineering role.

### Location:

GET Training facilities – Barnwood Point.

### Duration:

5 days or 10 days.

### Start date:

Please ring for dates of courses.

### Cost:

£405 per week.
