

Bridging Studies in Mathematics

Content:

This is a short Mathematics course aimed at anyone who wishes to progress onto our Level 4 HNC Mechanical Engineering course and need support with their maths studies.

Aimed at:

Typically learners enrolling for this course are:

- Employees who hold a level 3 Maths or Technical qualification but have been out of education for a while
- Employees who hold a level 3 qualification which has a limited Maths content such as some of the City & Guilds courses

Benefits/progression:

As contact time is limited there is a great deal of emphasis on learners further developing their maths skills away from GET in their own time between lessons.

The course will be culminated with an assessment paper. Learners who successfully pass this assessment will be invited to join our HNC course starting in September.

If this course is appropriate for employees in your organisation who you wish to further develop, or if you have any questions about GET and its courses, please contact me. My details are opposite.

Duration:

The course consists of a single lesson each week from 8am to 9:45am on Friday mornings running from November through to June.

Cost:

Please enquire for the latest course fees
