ON OUR

ABRASIVE WHEELS**TRAINING COURSES**

WHO IS THIS COURSE FOR?

Our Abrasive Wheels training course is perfect for delegates working in facilities, fabrication, maintenance or precision engineering roles. Aimed at both new starters and those who are experienced and requiring refresh, we have the flexibility to certify users in the set up and safe mounting of wheels for Angle, Pedestal and Precision grinding machines. This course will give delegates the theory and information behind Abrasive Wheels, as well as hands on practical training, on the machines they use on the job. A service that you can't recreate with online courses.

WHAT WILL YOU LEARN?

This course is interchangeable to suit the equipment that you use in the workplace. In compliance with PUWER and HSG17, this course will cover:

- Hazards and risks from the use of abrasive wheels
- Methods of marking abrasive wheels with their type, size and operating speed
- How to store, handle and transport abrasive wheels
- How to inspect and test abrasive wheels for damage
- Mounting of wheels on Angle, Pedestal or Surface Grinders
- Select and use appropriate PPE
- Properly adjust guards and tool rests as appropriate
- Understand the importance of RPM in relation to wheel maximum permitted speed
- Understand the function of flanges, blotters, bushes, arbors and nuts used to mount wheels
- Balancing, truing and dressing wheels

"I found the course very beneficial as I had never had experience with any sort of abrasive wheels before. I would highly recommend this course to anyone that is needing this to do their daily job"

COURSE DURATION

1 day

COURSE DATES

These courses are only available at request.
