

Electrical Maintenance Appreciation/Foundation Skills

Content:

During the course you will learn the basic Electrical skills in order to perform basic Maintenance tasks.

With an obvious focus on Health & Safety, you will learn how to correctly isolate and work with Electrical circuits.

You will learn how to interpret Electrical drawings whilst using various Electrical testing equipment to test and prove Electrical circuits and systems.

The course covers: -

- Safe Isolation, Lock Off and Tag of circuits
- Understanding Electrical circuits and diagrams
- Fault finding on 3 phase control panels
- Fault finding on power and lighting circuits
- Use of Electrical testing equipment

Aimed At:

Anyone who wants to learn basic theoretical and practical skills of an Electrical nature. The course is an ideal starting point for Mechanical Biased Engineers who want to upskill themselves with an Electrical appreciation.

Entry Requirements:

None

Location:

Gloucestershire Engineering Training,
Barnwood Point, Gloucester
Or
Customers site with appropriate resources

Benefits/Progression:

Completing this course will either give you or improve your knowledge and practical skills with respect to Electrical Maintenance.

You will also become competent in the use of various Electrical test equipment.

You could use this course as a spring board to becoming employed in a Multi Skilled (Dual) Engineering role.

Duration:

To be agreed with companies/individual to meet specific needs.

Start Date:

By arrangement.

Cost:

Price on application.
