

## Welding Appreciation/Foundation Skills

### Content:

During this course you will learn how to carry out basic welding procedures in one or more of the following processes – MIG, MMA or TIG.

You will learn the Health and Safety specifics to welding, basic process fundamentals, how to set and adjust the welding parameters, the consumables required, perform basic welding joints and how to recognise weld defects including their causes.

### Benefits/Progression:

Upon completing the course successfully, you will have a basic level of knowledge and practical skill with respect to Manual Welding processes.

This in turn will improve your current skill set or help you to progress onto further courses or levels.

### Aimed At:

Anyone who wants to learn basic Welding techniques. Engineers who wish to upskill themselves or Graduates who want to add practical appreciation to their theory.

### Duration:

To be agreed with companies/individuals to meet specific needs.

### Entry Requirements:

Good hand to eye co-ordination and dexterity.

No formal qualifications required.

### Start Date:

By arrangement

### Location:

Gloucestershire Engineering Training,  
Barnwood Point, Gloucester

### Cost:

Price on application
