

get SKILLED!

ON OUR
ELECTRONIC MAINTENANCE
SKILLS COURSES

WHO IS THIS COURSE FOR?

Our Electronics training courses cover two levels; Beginners Electronics Assembly and Maintenance and Intermediate Electronics Maintenance and Testing. This approach offers the perfect opportunity for people that are new to Electronics to learn core skills and for those at a higher level, the opportunity to have skills stretched and challenged, supporting further progression.

WHAT WILL YOU LEARN?

Electronics safe working practices and theory are deeply embedded throughout a range practical training tasks to give delegates an understanding of:

Beginners Course:

- Safe working practices in line with HASAWA and PUWER
- ESD safe working procedures
- Understand common components including Passive Components, IC's, and PCB's
- Reading Schematic diagrams and symbols
- Designing and building of circuits
- Soldering
- Use of Multimeters and Oscilloscopes
- Introduction to testing and fault finding

COURSE DURATION

4 ½ Days
