## ON OUR PNEUMATICS SKILLS COURSE

### WHO IS THIS COURSE FOR?

Our Pneumatics course is perfect for those new to Pneumatics and Electro-Pneumatics. This hands-on course builds a solid understanding of pneumatic and electro-pneumatic systems, starting with the fundamentals of compressors, air receivers, and system safety. Learners will develop the ability to read and interpret pneumatic symbols and schematics, progressing to the construction and testing of a variety of control circuits.

### WHAT WILL YOU LEARN?

This course will cover, but is not limited to:

- Safe working practices, identification of hazards, and appropriate use of PPE
- Introduction to pneumatic systems, including compressors, air receivers, and air preparation units
- Reading and interpreting pneumatic and electro-pneumatic circuit diagrams and symbols
- Assembly and testing of basic and advanced pneumatic and electro-pneumatic circuits

This course is delivered using industrial-standard equipment and components. Company-specific systems, control elements, or circuit designs can be integrated upon request, though additional charges for specialised materials may apply.

### COURSE DURATION

2 ½ days

### COURSE DATES

- May 26 - 28 2026
- July 21-23 2026
- August 25 - 27 2026
- October 27 -29 2026

### PRICE

£990 per delegate, Maximum 6 delegates

### CERTIFICATION

A GET certificate of training is awarded on completion of the course
