

# SKILLED!

ON OUR

**WELDING**

**SKILLS COURSE**

## WHO IS THIS COURSE FOR?

Our Welding course is perfect to people completely new to Welding or those with experience already. Hobbyists, Fabricators and Engineers alike will all find the opportunity to expand their skillsets or stretch existing skillsets further. Employers in Manufacturing, Aerospace and Food and Drink will find a wide range of flexibility within our course delivery to suit MIG, TIG and MMA welding as well as welding of different material profiles in Mild Steel, Stainless Steel and Aluminium

## WHAT WILL YOU LEARN?

This course will cover, but is not limited to:

- Safe working practices, awareness of hazards and PPE
- Set up of welding equipment including Machine, Gas, Torch and consumables
- Setting of machine parameters to suit different materials and thickness
- Welding of common joints including Lap, Tee, Open Corner and Butt.
- Inspection of welded joints and identification of defects
- Reinstatement of machinery and equipment after use

This course operates in Mild Steel sheet as standard with the option to progress onto Stainless Steel and Aluminium. Box, Tube, Profiles and company specific components can be covered on request but may occur additional materials fee.

*"My introduction to TIG course has given me all the skills I need for my current job"*
