Furthering learning and skills  
for the engineering industry

### **Gloucestershire Engineering Training**

is the lead training provider of engineering apprenticeships and skills training to mechanical and electrical engineering companies across Gloucestershire

# Why Engineering?

It's all around you. Wherever you are, wherever you stand, everything has been designed and built by engineers – mobile phones, iPads, fast cars and aircraft. Working with businesses and designers, engineers are responsible for finding the best materials and calculating how best to manufacture the product.

## What's in it for you?

- First class training opportunities - it is rewarding but demanding.
- Nationally recognised qualifications.
- Choices for a future in engineering.
- Opportunities to progress into higher education.
- A good wage from the day you start.

## Why choose Gloucestershire Engineering Training?

Gloucestershire Engineering **Training** is consistently above the national average for successful completions of apprentices who start with Gloucestershire Engineering **Training** and achieve their full apprenticeship. If you're ambitious, smart, prepared to work hard and interested in engineering, then Gloucestershire Engineering **Training** is the right choice for you. We pride ourselves on the way we support and help our apprentices.

## What is an apprenticeship?

It's the first stage of your journey and the start of an exciting and rewarding career in engineering. You will earn as you learn and be employed by a local company. You will receive a salary from day one. Your apprenticeship will last up to four years. Your first year will be spent in our engineering training centre here in Gloucester.

## Which qualifications will you need?

A minimum of 5 GCSE's at grades A – C including Mathematics, English and Science, or Grades 4 – 9 (under the new grading structure).

## Where will it take you?

- You will be working for a local company on a wide variety of projects.
- You will have the potential for promotion within your company.
- Many of our apprentices have their further education studies sponsored by their company after completing their apprenticeship.
- Find out about GET's Higher Education courses [www.get-trained.org/courses-apprenticeships/other-courses](http://www.get-trained.org/courses-apprenticeships/other-courses)

## These are the three parts of your Apprenticeship

1. Competency - this is the practical hands on element of the programme
2. Knowledge - this is the theoretical part of the programme
3. Behaviour - this is part of the programme that builds your work ethic and ensures you are equipped with the correct attitude and behaviour to perform well in your place of work.

All three parts of the programme must be achieved in order to qualify for an apprenticeship completion certificate.

## Interested? [apply@get-trained.org](mailto:apply@get-trained.org)

### When to apply

**Gloucestershire Engineering Training** programmes start in September of each year, however, employers will start their recruitment process from January.
